RE: Marine Power Consent Decree C85-382R

Gentlemen:

I have been asked by Ruth Nelson to oversee the filing of the removal and disposal plan as required in Section IV C of the Consent Decree. The filing date is set out as no later than one hundred and twenty (120) days after the entry of the Consent Decree. My calculation places that date at Saturday, May 28, 1988.

I have learned just this morning that Marion (Doc) Church, who is coordinating the work and doing the bottom drawings, is on vacation all of this week. Therefore, it is not possible for the documents to be in your hands prior to Saturday, May 28, 1988.

I did speak with Mr. Partee this morning regarding policies for the method to calculate the one hundred and twenty (120) days: i.e., are holidays counted so that the 120 days is actually later?

I expect to have all documents ready to send to you on June 1, 1988. I can indicate that both Farr, Friedman & Bruya, Inc., and Geo Engineers have been employed to supply the reports to be sent to you.

Should you have any concerns or objections to the documents being sent to you on June 1, 1988, please advise me of such. I

RE: MARINE POWER CONSENT DECREE

have noted in my phone log that Mr. Partee is in agreement with this date.

Thank you for your attention to this matter.

Sincerely,

MARINE POWER & EQUIPMENT CO., INC.
